

PAINT CAN CRUSHER MODEL PCC1

Prepares one gallon paint cans and their contents for recycling at the rate of 300 cans per hour! No need to remove can lids!

AUTOMATIC CYCLE Automatically pierces paint can and squeezes out contents while flattening can.

CHOICE OF POWER PCC1 models can be powered by shop air or 115V AC, 115/230V Single Phase, or 230/460 3 phase for more speed or compressed air.

SAFE, EXPLOSION PROOF

Unit will not operate with door open. Explosion proof power supplies are suitable for use with oil base paints or other flammable liquids.

HYDRAULICS

Rugged two-speed hydraulic pump provides up to 30,000 pounds of force.

LIQUID COLLECTION

Stand allows unit to be placed over a 55 gallon liquid collection drum on a roller conveyor. Other arrangements available.

RESULTS!

The PCC1 prepares 300 one gallon paint cans and their contents for recycling each hour. **Can lids are left on**, which means faster processing, much lower labor costs, and greatly reduced personal injury potential. The PCC1 produces a 1/2 inch dished pancake with less than 3% residuals. **And 15 crushed cans fit into the same space as one whole can!**
