The Recycle Systems Company Inc.

Environment, Health and Safety Policy

In the conduct of our business, The Recycle Systems Company Inc. is committed to a health, safety and environment program which protects our staff, our property, our sub-contractors, the environment and any and all others who are impacted by this operation and its products.

The Recycle Systems Company Inc.'s policy is to:

- Identify, assess and responsibly manage safety, health and environmental risks in all of our activities.
- Comply with legal requirements and, where justified, develop more stringent company standards.
- Design, construct and operate our facility and processes in an environmentally responsible and safe manner.
- Provide the people who generate waste to us and the people who handle or use our products with information concerning the potential hazards and the safe use and disposal.
- Communicate in a timely fashion with employees, customers, governments and the community to promote understanding of the nature of our business activities and any relevant safety and environmental risks associated with our products and operations.
- Conduct audits of our facility and operations as well as facilities and operations of our sub-contractors to ensure compliance with this policy and continuously improve performance.

To meet The Recycle Systems Company Inc.'s commitment to health, safety and the environment, the management is accountable to provide the necessary system, human and financial resources to ensure full compliance with this policy. All employees and sub-contractors are responsible to participate in the implementation of this policy and perform their work in a manner that adheres to the policy requirements.

Tim Underwood
Executive Vice President
and General Manager
